DETAILED ACTION

Drawings

The drawings are objected to because Figure 3 and Figure 5 are not in 1. compliance. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the

Application/Control Number: 10/621,706 Page 3

Art Unit: 3752

art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 1-14 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the written description requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to reasonably convey to one skilled in the relevant art that the inventor(s), at the time the application was filed, had possession of the claimed invention. Figure 3 is not in compliance with Figure 5 making it is unclear precisely how the suspension works. The telescopic cylinders (38) are not attached to the same location on the arms (13) in each of the figures. Furthermore, applicant is advised not to introduce new subject matter into any amended claims or amended specification in order to overcome this rejection in response to this office action.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

⁽a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 10/621,706

Art Unit: 3752

5. Claims 1,2, 4, and 11 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 3,447,750 to Weston in view of U.S. Patent No. 6,299,181 to Ericksson.

Weston discloses a spraying boom (1 and 2) mounted on an agricultural tractor for chemical spraying, wherein the boom is attached to a frame (tractor body, Figure 6). Additionally the boom and tractor have shock absorbers (26) and means for moving the boom (see column 4 lines 24 to 37), which also act as a dampener (see column 1 lines 55 to 62). Weston does not disclose six tires along the frame with hydraulic drive, suspension mounted to the frame, a support with a first and second end, the shock absorbers disposed between the support and the frame.

Ericksson discloses a vehicle capable of supporting a boom. The vehicle has more than six wheels (21-24, 26, 27, 33, 34), each wheel having a hydraulic drive and suspension including a support arm having a first and second end (71, 83, etc. See Figure 1). One end of the support arm is attached to the frame (32) and the other end is rotatably mounted to the wheels. See Figure 1. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the boom and tractor of Weston with the wheels and suspension of Ericksson in order to improve the traction and stability over rough terrain.

6. Claims 3 and 8 are rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 3,447,750 to Weston and U.S. Patent No. 6,299,181 to Ericksson as applied to claim 1 above, and further in view of U.S. Patent No. 4,515,311 to Takata.

Application/Control Number: 10/621,706

Art Unit: 3752

Weston does not disclose that the boom and tractor has a boomless spraying mode or flotation tires. Takata discloses a vehicle with a mounted spray nozzle having flotation tires. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the boom and tractor of Weston with the spray nozzle and flotation tires of Takata in order to allow the vehicle to produce a common alternative spraying mode and to travel through land and water.

7. Claim 5 is rejected under 35 U.S.C. 103(a) as being unpatentable over U.S. Patent No. 3,447,750 to Weston and U.S. Patent No. 6,299,181 to Ericksson as applied to claim 1 above, and further in view of U.S. Patent No. 6,086,077 to Staurt.

Weston does not disclose the boom and tractor having air bag shock absorbers. Stuart discloses a suspension system using air bags (13) in combination with shock absorbers. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the boom and tractor of Weston with the air bag suspension of Staurt because it is a common alternative that provides better shock absorbance over rough terrain.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Seth Barney whose telephone number is (703) 308-2603 until November 21, 2004. Effective November 22, 2004 the number will be (571) 272-4896. The examiner can normally be reached on 7:30am-4:00pm (Mon-Fri).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Dave Scherbel can be reached on (703)308-1272. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
